CEMINTEL®

New materials influence the way buildings are defined. Cemintel is responding to the growing importance of external and internal cladding with the release of Territory.

The Territory cladding range responds to the preference for prefinished, lightweight materials and the desire for buildings to enhance the environment where we live.

From external façades to interior surfaces, Territory is a reinterpretation of cladding as we know it.

It's the future of building and it starts now.

THIS IS CEMINTEL
TERRITORY

## CREATED FOR YOU. THIS IS WHERE YOU LIVE AND EVERY DAY YOU SEE IT.

A natural cladding range that comes from Japanese values of simplicity, nature and quality. It is a building block for your home.

The prefinished cladding panels simulate materials like stone, timber, concrete, metal, tiles and smooth render in a sophisticated way to enhance building facades, with minimal ongoing maintenance.

We know the importance of cladding. It is more than just looking good, it protects you and your loved ones. Through constant innovation we bring you more choice, better performance and greater comfort.

Your life never stops changing.
Redefine your Territory to match your life.

External Horizontal System Overview

Air Barrier

Stud framing at 600mm max. cts (double studs at all vertical sheet joints)

Joint Backing Strip at all vertical joints

Panel Clip at 600mm max. cts

Corner Clip

Pre-formed Corner

Starter Strip

Base Flashing taped to Air Barrier

Cemintel Territory Panel

Foundation

Mask, prime and fill all vertical panel joints with colour matched joint sealant

WHY TERRITORY?

Prefinished panels are available in a variety of colours and simulated textures.

Minimal ongoing maintenance required.

Simple clip fixing system that **goes together like Meccano®** from the starter strip.

The Territory system provides a **ventilated cavity** to keep your building dry.

NichiGuard® **stain resistant and self cleaning coating** available on panels.

Platinum coating technology **protects against UV damage and colour fade**.

Free from asbestos and safe to use in Australian building projects.

Panels are machined with a complementary tongue and groove profile that **easily fit together**.

A compressible sealing strip is factory bonded onto the tongue profile to form a **weather resistant joint**.

Choice of simple aluminium or colour matched, preformed **corners** to suit your desired aesthetic.
