CEMENT INTELLIGENCE

FAÇADES & CLADDING CLADDING SHEET

A more traditional product, Cemintel® Cladding provides a lightweight panel solution in a most simple form.

The panels are manufactured in Australia. They are both clean and smooth, not furry – this enables them to be paint ready and ultimately provide a better painted finish.

It is very easy to install with traditional nail-on-frame methods. There is also an option for a drained cavity cladding solution.

The square edge panels are available in a range of sizes making it versatile in application and minimises waste. Joints can be covered with PVC moulds or timber.

Cemintel Code	Thickness (mm)	Width (mm)	Length (mm)	Mass (Nominal)	Panels per pack
10198	6	900	2400	9.7kg/m ²	30
10202	6	1200	1800	9.7kg/m ²	30
10203	6	1200	2400	9.7kg/m ²	30
10205	6	1200	2700	9.7kg/m ²	30
10206	6	1200	3000	9.7kg/m ²	30
