FLOORING & DECKING CERAMIC TILE UNDERLAY

Cemintel's Ceramic Tile Underlay is manufactured in Australia and is for internal use. It is easily installed with a pre-printed nail pattern guide and is a cost effective way to form a flat substrate for laying ceramic tiles over existing floors.

The product provides a thinner solution for a tile substrate that minimises the impact to your floor levels to surrounding areas.

It is an effective option to use over tongue and groove hardwood floors when it's time to tile over them.

System Overview

// Pre-printed nail pattern guide

Cemintel Code	Thickness (mm)	Width (mm)	Length (mm)	Mass (Nominal)	Panels per pack
10243	6	900	1800	9.4kg/m ²	30
450720*	6	1200	1800	9.4kg/m ²	30
450740	6	600	1800	9.4kg/m ²	60

*Pre-printed nail pattern guide not available on 6mm x 1200mm x 1800mm size.
