## INTERNAL LININGS CEMINSEAL® WALLBOARD

CeminSeal® Wallboard is the flagship product of the business and manufactured in Australia. It is a superior wet area internal lining and tile substrate product designed and tested for compliance and peace of mind.

Cemintel's unique CeminSeal® water block technology repels water and increases paint adhesion. It has been applied to the face of the panel and been tested to show increased water resistance as water beads instead of soaking in.

The smooth finish of CeminSeal® Wallboard is due to Cemintel's unique full steel template manufacturing process. The smoother the finish of the board means less work for the contractors for fixing and setting. At the same time, it provides an excellent paintable surface.

CeminSeal® Wallboard is available in either recessed edge or square edge options.

The product is suitable for impact resistance in environments such as schools and hospitals.

System Overview – Square Edge Wallboard

System Overview – Recessed Edge Jointing – Tiled areas

Cemintel Code	Edge Profile	Thickness (mm)	Width (mm)	Length (mm)	Mass (Nominal)	Panels per pack
95847	Recessed	9	1200	2400	14.5kg/m <sup>2</sup>	30
95848	Recessed	9	1200	2700	14.5kg/m <sup>2</sup>	30
95850	Square	6	1200	2400	9.8kg/m <sup>2</sup>	30
